PROFESSIONAL SUMMARY

BCA student with strong fundamentals in Python programming and hands-on experience through academic and self-built projects. Worked on Python-based applications including web development, automation programs, and basic data handling. Actively seeking an opportunity to apply analytical, technical, and problem-solving skills in a professional environment and grow within a dynamic organization.

TECHNICAL SKILLS

Programming Languages: Python

Machine Learning: Scikit-learn, Random Forest, Feature Engineering, Model Evaluation

Data Analysis: Pandas, NumPy, Matplotlib

Web Development: Django, Streamlit, HTML, CSS

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code

PROJECTS

AI-Based Emotion Detection & Music Recommendation System | 2024

Python | Scikit-learn | Pandas | NumPy | Streamlit

- Built a Random Forest classifier to predict user emotions from typing behavior with functional accuracy.
- Performed feature extraction and data preprocessing using Pandas and NumPy.
- Created an interactive Streamlit interface for real-time emotion detection and music recommendations.
